E Juice Mobile

E Juice Desktop

Technical Performance Improvement Plan

- Images and banners
 - Biggest load bottleneck
 - Convert to webp and size properly
- Audit theme, CSS, and JS to see where unused classes can be minimized
- Elements on both sites are not properly responsive on mobile

▲ Reduce JavaScript execution time — 10.7 s	▼
▲ Minimize main-thread work — 25.4 s	▼
▲ Reduce the impact of third-party code — Third-party code blocked the main thread for 8,440 ms	▼
▲ Largest Contentful Paint element — 44,310 ms	▼
▲ Avoid large layout shifts — 2 layout shifts found	▼
▲ Avoid an excessive DOM size — 4,181 elements	▼
▲ Serve images in next-gen formats — Potential savings of 5,850 KiB	▼
▲ Properly size images — Potential savings of 5,116 KiB	▼
▲ Efficiently encode images — Potential savings of 3,478 KiB	▼
▲ Reduce unused JavaScript — Potential savings of 591 KiB	▼
▲ Reduce unused CSS — Potential savings of 52 KiB	▼
▲ Eliminate render-blocking resources — Potential savings of 150 ms	▼
▲ Defer offscreen images — Potential savings of 3,402 KiB	▼
▲ Page prevented back/forward cache restoration — 3 failure reasons	▼

DIAGNOSTICS	
▲ Minimize main-thread work — 37.1 s	▼
▲ Largest Contentful Paint element — 11,640 ms	▼
▲ Eliminate render-blocking resources — Potential savings of 2,580 ms	▼
▲ Reduce the impact of third-party code — Third-party code blocked the main thread for 3,860 ms	▼
▲ Avoid an excessive DOM size — 7,775 elements	▼
▲ Reduce JavaScript execution time — 14.8 s	▼
▲ Properly size images — Potential savings of 66 KiB	▼
▲ Page prevented back/forward cache restoration — 1 failure reason	▼

Further Technical Action Plan

- Implement more robust schema and structured data to be dynamically generated for each product page
 - Add reviews
 - Fix JSON errors
- Utilize search console to resolve 4xx errors and zombie pages on both sites
- Add last modified tag to sitemaps on both sites
- Add sitemap URLs to robots.txt for both sites
- Implement rel="canonical" dynamically for product pages on both sites

Blog Strategy

- Articles are regularly published, but are often wordy
- Consider adding more images of the product
- Adjust embedded product links to instead feature a button that can add the product directly to cart without navigating to product page
- Many posts read like ads for a particular line or product with very corporate-sounding copy
 - Users want to instead see review data, comparisons to similar products, etc
- List the individual who wrote the article and create an author page for each contributor

UX Suggestions

E Juice

- Our Blogs section in header is way too cluttered with individual articles
 - Instead just include the categories (Culture, How To, Reviews, etc)
- Remodel home page carousel to be more visually similar to that of VR
- Use easily-loaded icons and images alongside product types or brand names

Vape Ranger

- Add mouse hover feature to product thumbnail like on EJ
- Correct format of FAQ page

Both Sites

- Consider linking to the equivalent product page on the other site
 - E.G. “Buying for wholesale distribution? Check out our page on VapeRanger.com” and link directly to PDP
- Consider methods for more unique visual identity on home pages
 - E.G. switch up the color branding on home pages rather than just have black white and gray

Social Media

- Aggressively expand social media content
 - Take pre-existing content from blogs
 - Use as basis for video
 - Clip as short-form for TikTok, Reels, Shorts
 - Expand both brands to include YouTube, TikTok, X, Facebook, Bluesky and upload at least weekly
 - Ensure that corporate accounts are properly verified and all company info is included and accurate
- Consider having an individual to be the face of each brand on social media

Miscellaneous/Next Steps

- Email/Retention Audit
 - How are customers currently encouraged to review their order or purchase another product?
- Paid Search Audit
 - What legal restrictions are in place for paid search within this industry?
- Company Relationships
 - What distributors or frequent clients does ECVD regularly deal with? How can these relationships be leveraged for backlinks or sponsored content in the future?

Proposed High-Level 30-60-90 Day Plan

30 Days

- Minify unused CSS and JS, optimize images
- Implement schema, sitemaps, robots.txt updates
- Optimize banners and other elements for mobile
- Expand corporate social media portfolio and generate 4 pieces of content that can be cross posted on all social media platforms
- Learn about the vape industry and the roles of everyone at the company
- Set up A/B testing for email marketing, UX improvements, and social media posting

60 Days

- Generate enough social media content to allow for a backlog of 1 month
- Develop more robust embedding system to display product structured data in blog
- All blog content <6 months old have more images, information, and more visibly accessible product info and purchase page
- Explore company/industry connections to obtain backlinks to both sites
- All 4xx error and orphan pages removed
- Major UX changes finished based on A/B test results

90 Days

- Generate social media backlog of 2-3 months
- Explore company/industry connections to obtain backlinks to both sites as well as curate/create content for those connections
- Be prepared to give a more in-depth strategy based on A/B test performance and lessons from new strategies
